1. THE CENTRE FOR NURSING STUDIES

1.1 MESSAGE FROM THE CENTRE FOR NURSING STUDIES

Welcome to the Centre for Nursing Studies (CNS) and the Bachelor of Nursing (BN) (Collaborative) Program.

The information in this handbook is designed to facilitate your adjustment to the nursing program. It provides a concise reference source for both students and faculty. Presented is general information regarding the organization of the school, the philosophy and conceptual framework from which the curriculum is developed, and the services/resources available to students.

The handbook outlines the policies and procedures governing curriculum activities. Included are academic, clinical and professional standards which students are expected to meet to successfully complete the nursing program.

1.2 CNS PROGRAMS

The Centre for Nursing Studies, established in 1996, is operated by Eastern Health.

An innovative baccalaureate curriculum was developed through the collaborative efforts of all schools of nursing in the province and implemented in the 1996-97 academic year. The BN (Collaborative) Program is delivered through a consortium partnership with Memorial University of Newfoundland and Western Memorial Health Care Board. It is designed to maximize the personnel, educational and material resources of basic nursing programs and to enhance the opportunities for individuals to be prepared at the baccalaureate level for entry into professional nursing practice.

The BN (Collaborative) Program was awarded a seven year accreditation status by the Canadian Association of Schools of Nursing (CASN) and full approval from the Association of Registered Nurses of Newfoundland and Labrador (ARNNL) in 2015.

In addition to the four year Bachelor of Nursing (Collaborative) Program, the CNS offers a Practical Nursing Program and Continuing Education Programs for RNs and LPNs.

1.3 SOUTHCOTT HALL LOCATION

The CNS is housed at the Miller Centre Site, operated by Eastern Health.

This site includes the Miller Centre, the Department of Veterans Affairs (DVA) Pavilion and Southcott Hall.

The CNS occupies seven floors of Southcott Hall:

- Basement Level - Student lockers and Lounges, Records Room and Conference Room, Nursing Skills Labs
- Ground Floor – Classrooms, the Learning Resource Centre (LRC), CNS Mailroom and Office of the CNS Operations Officer
- First Floor - Classrooms, Computer Labs and Nursing Skills Labs
- Second Floor - Conference rooms, Nursing Society Office, International Nursing Office and Faculty offices
- Ninth Floor - Nursing Skills Labs and Faculty offices
- Tenth Floor - Faculty, Secretarial and Administrative offices
- Eleventh Floor – Faculty, Secretarial, Administrative offices and the Research Office

The allocation of classroom, lab and conference room space for each year of the program will be posted at the beginning of each semester.

Once the master schedule for the semester has been posted, additional booking requests will be handled as follows:

- Classroom Space – Administrative Assistant to the Director (Office 1031)
- Lab Space – Instructional Resource Centre (IRC) Coordinator (Office 1118)
- Conference Room Space – Learning Resource Centre (LRC)

1.4 ACCESS TO THE BUILDING

Access to the CNS may be gained via the main entrance to Southcott Hall, Monday to Friday 06:00 – 18:00. Students needing access during evenings, weekends and holidays will be required to use the main entrance of the Miller Centre which is opened from 06:00 – midnight daily.

Students are reminded that access to the LRC, IRC and mailroom will only be provided during the hours when staff and/or student proctors are available. Students may gain access to the CNS Mailroom for drop off purposes only until midnight of each day when the Miller Centre entrance is locked. Students are requested not to ask security personnel to provide access to these areas after the designated hours.

1.5 MISSION, VALUES & VISION OF THE CENTRE FOR NURSING STUDIES

Our Mission

The Centre for Nursing Studies will deliver a continuum of nursing education programs that prepare highly competent practitioners and leaders through a commitment to excellence in teaching, practice, research and other forms of scholarship.

Our Vision

To enhance excellence and leadership in nursing education, innovation, partnerships, research and other forms of scholarship.

Our Values

Collaboration

Collaboration is the guiding principle in our approach to education, research and other forms of scholarship, practice, and international development.

Diversity

We respect diversity and foster inclusion among students, faculty, staff and partners.

Excellence

Excellence is a means of assuring we prepare the highest quality practitioners and leaders.

Professionalism

We embody professionalism through continuous learning and the highest standards of integrity, ethical behavior, accountability, and transparency.

Respect

Respect is the foundation of all our interactions.

2. BN (COLLABORATIVE) PROGRAM

The Centre for Nursing Studies, Memorial University School of Nursing and Western Regional School of Nursing support the highest standards of academic and professional ethics. Ethical behaviour encompasses integrity, conduct, respect, and professionalism. It also means that students will take responsibility for their learning and pursue academic goals in an honest and engaged manner to reflect the principles, values, and expectations that are espoused as members of the Schools of Nursing and future nurse professionals

2.1 MISSION STATEMENT

The mission of the BN (Collaborative) Nursing Program is to prepare competent entry-level nurses to practise in a variety of settings in a changing health care environment. The program fosters life-long learning, a spirit of inquiry and the pursuit of excellence. The program reflects the collaborative efforts of the province's three Schools of Nursing: The Centre for Nursing Studies, Memorial University of Newfoundland School of Nursing, and Western Regional School of Nursing.

2.2 PHILOSOPHY

The philosophy is comprised of the following: beliefs about person, society, environment, health, nursing, and nursing education.

Person

A person is an integrated, distinct, and unique whole with biological, psychological, social, cultural, and spiritual dimensions. Each person has inherent value, worth and dignity, and possesses the potential for self-determination and self-reliance within her/his own ability. A person has the right to be fully informed and to make decisions and choices. Persons include clients/individuals, families, groups, communities, and populations.

Society

Society is the composite of persons sharing a variety of values, interests, needs, and goals that change over time. Society unfolds from a heritage of human interaction and transition. It influences and is influenced by nursing practice and health care.

Environment

Environment is inclusive of social and physical components, surroundings, and circumstances of the person as well as the political, cultural, and economic structures of the global environment.

Health

Health is a dynamic process of physical, mental, spiritual, and social well-being. It is a resource for everyday living and is influenced by a person's beliefs, values, attitudes, and the determinants of health (Federal, Provincial and Territorial Advisory Committee on Population Health, 1994). Wellness and illness are dimensions of health.

Nursing

Nursing is an evidence-informed practice profession grounded in the integration of art and science. The art of nursing is reflected in nurses' behaviours, relationships, and attitudes. The science of nursing is based on the body of knowledge of the discipline of nursing and its synthesis with the natural, social, and behavioural sciences. Nursing focuses on the interrelationship between persons, society, environment, and health in achieving health outcomes.

Caring, a central concept in nursing is interpreted to include competence, conscience, commitment, confidence, and compassion (Roach, 1992). Caring involves the development of empowering relationships that preserve, protect, and enhance human dignity (Canadian Community Health Nursing Standards of Practice, 2003).

Nursing Education

Nursing education is the preparation of graduates with knowledge, values, attitudes, and skills that are necessary for professional practice and with a foundation for continued learning at advanced levels of education (CASN, 2004).

2.3 CONCEPTUAL FRAMEWORK

The conceptual framework of the BN (Collaborative) program consists of curriculum, teaching and learning, and nursing practice.

Curriculum

The curriculum is an organized and sequential plan of educational opportunities. While nursing knowledge is a major emphasis, the arts and sciences enhance the broad knowledge base required. The curriculum builds on and incorporates previously learned concepts and reflects the principles of primary health care (WHO, 2008). It is informed by evidence and grounded in nursing's values, knowledge, theories and practice. The curriculum also provides the basis for further education.

The curriculum addresses health issues that affect persons across the lifespan and in a variety of practice settings. The initial focus is on the wellness dimension of health, beginning with health promotion and health protection, then progressing to include health maintenance, rehabilitation, restoration, and palliation. The curriculum prepares the student to understand and work within the dynamic relationships among person, health, society, environment, and nursing.

Opportunities are provided to enable students to acquire the competencies (knowledge, values, attitudes and skills) required for entry-level practice. Critical thinking skills including professional reflection, self-evaluation, ethical decision-making, and clinical judgment are facilitated progressively throughout the curriculum. Technological competence is enhanced through use of information technologies and infrastructure.

The curriculum emphasizes the development of partnerships among students, educators, and others, e.g., healthcare professionals, throughout the educational process. Interprofessional learning, consistent with primary health care, is facilitated through the development of professional relationships with other health team members and other sectors of society.

The program prepares students to apply beginning research skills and utilize knowledge informed by evidence. Students are prepared to advance the profession and to provide leadership in a changing system of health care. Students are also taught to identify and respond to emerging nursing and health issues.

Teaching and Learning

Teaching and learning are dynamic lifelong growth processes. They are reciprocal and interactive, characterized by creativity and flexibility, and meet the diverse and changing needs of the students, the nursing profession, and health needs of society.

Students, educators, and others are partners in the educational process. The program uses a participatory/collaborative approach to nursing education that provides direction for the teaching and learning experiences. The humanistic educational climate fosters caring, respect for self and others, autonomy, critical thinking, and a spirit of inquiry.

Throughout the program students are active participants, are responsible for the discovery of knowledge, and are accountable to communicate this with others. Further student responsibilities include availing of learning opportunities, seeking and utilizing feedback throughout their learning process, and integrating competencies required for entry-level practice in nursing. Students internalize the values, ethics, and behaviours endorsed in the ARNNL Standards of Practice, and understand that continued learning is essential for professional nursing practice.

Educators facilitate knowledge discovery and professional socialization by guiding, mentoring, role modeling, and challenging students to be self directed, reflective, and creative. Educators acknowledge diverse student life experiences and support individual learning styles. A variety of strategies and supportive structures are used to foster teaching and learning and professional development of the student. Educators have the responsibility to ensure that evaluation practices and standards are consistent with university policies, and with national and provincial nursing education standards.

Nursing Practice

The goal of nursing practice is to assist persons across the lifespan in a variety of practice settings to achieve their desired health outcomes. Nurses assist persons to recognize and develop their capacity for self-determination and self-reliance. The provision of safe holistic care to persons requires clinical reasoning, critical thinking, technological competence, effective communication skills, and a commitment to lifelong learning.

Nursing practice requires collaborative relationships and partnerships with persons, health team members, and other sectors of the community in the performance of nursing roles. Nurses also collaborate with persons in the mobilization of communities toward healthy development and capacity building. Nursing roles include direct caregiver, educator, counsellor, advocate, facilitator, coordinator of care, researcher, and leader. These roles require the nurse to be aware of the changing social, cultural, economic, technological, environmental, and political contexts of health care in Canada and globally. The presence of role models is essential to the professional socialization of students.

Professional standards and competencies, legal standards and the CNA code of ethics guide nurses' practice. Nurses are accountable to society for safe, ethical, competent and effective nursing care. Nurses advocate for quality work

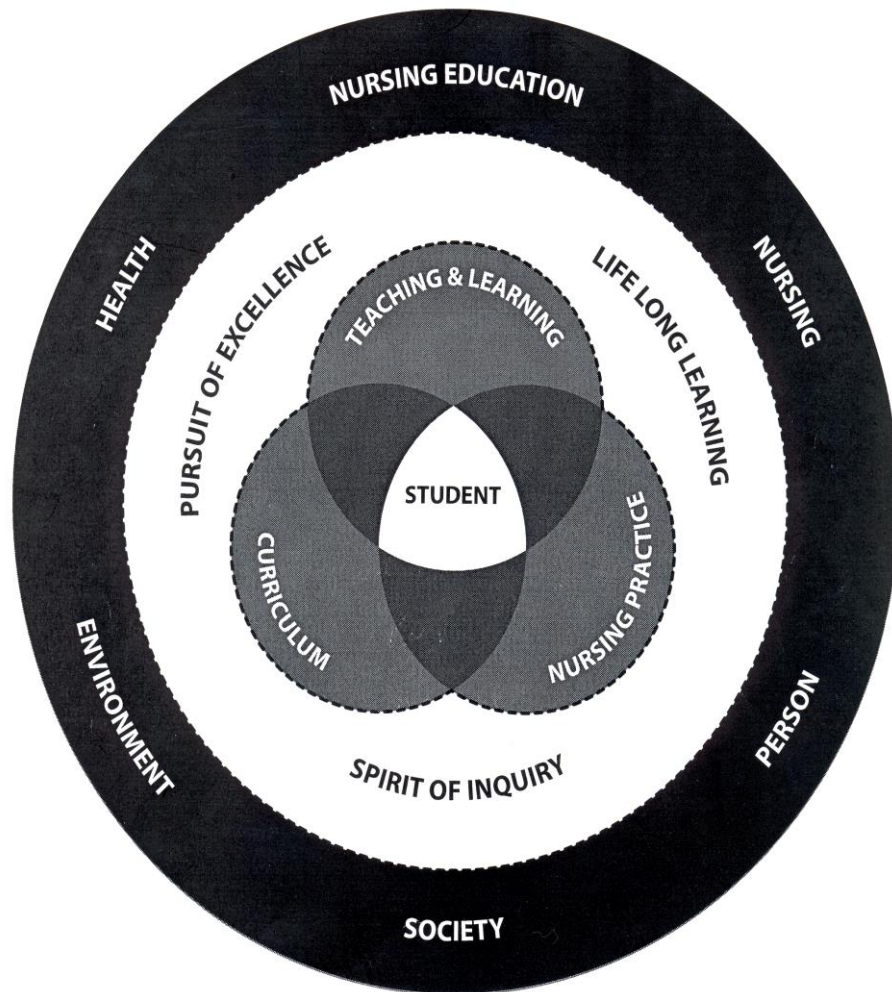

environments and patient safety. Nurses practice independently and inter-professionally, advancing the profession of nursing and influencing changes in health care.

2.4 CHARACTERISTICS OF THE DEGREE GRADUATE

The BN (Collaborative) Program is designed to prepare graduates who will function as beginning practitioners within a variety of health care settings. The graduate is prepared to assume the roles of direct care giver, educator, counselor, advocate, and facilitator, coordinator of care, researcher, leader and member of the nursing profession. The program prepares the graduate to develop the competencies which include knowledge, values, attitudes and skills required to:

1. Practice holistic nursing within a variety of settings, by collaborating with individuals, families, groups and communities, to assist them to achieve health and well-being through health promotion, illness and injury prevention, maintenance, restoration and palliation.
2. Practice the caring ethic as an integral dimension of nursing.
3. Create a caring environment through effective communication with individuals, families, groups and communities.
4. Develop an approach to the care of individuals, families, groups and communities which reflects a synthesis of concepts and theories of sciences, humanities and nursing.
5. Create a personal framework for nursing practice.
6. Provide competent nursing care to meet the health related needs of individuals, families, groups and communities.
7. Use management and leadership skills to co-ordinate and enhance health care within society.
8. Foster the extension of nursing knowledge through use of and participation in nursing research.
9. Use critical thinking to assist individuals, families, groups and communities to achieve health and well being.
10. Participate in interprofessional practice among the different health care providers participating in the delivery of health care.
11. Appraise how nursing roles emerge as the needs of society evolve.
12. Practice nursing in relation to legal, ethical and professional standards.
13. Accept responsibility for lifelong personal and professional growth using formal and informal strategies for the continuous discovery of knowledge.
14. Recognize the contributions of the nursing profession in global health affairs.
15. Accept responsibility for the promotion of change in health care in response to social, cultural, political, and economic factors.

2.5 CONCEPTUAL MODEL

2.6 CONTENT MAP BACHELOR OF NURSING (COLLABORATIVE) PROGRAM

FALL	WINTER	SPRING
1002 Anatomy and Physiology I (Lab) 1003 Developing Therapeutic Relationships (Lab) 1004 Introduction to Nursing 3 credit hours in English Biochemistry 1430 (Lab)	1012 Anatomy and Physiology II (Lab) 1014 Health Assessment (Lab) 1015 Health Promotion Throughout the Lifespan (Lab) 1016 Healthy Aging 1017 Fundamental Psychomotor Competencies (Lab) 1520 Extended Practice I (96 hours) Psychology 1000

4103 Issues in Nursing & Health Care 4100 Advanced Concepts and Skills (Seminar) 4501 Community Health Nursing Practice II 3 credit hours in Political Science	4512 Community Health Practicum (160 hours) 4516 Consolidated Practicum (400 hours)	Award of BN Degree

NOTE: These courses will be offered during the same year at all sites, but the semester of course offering may vary with each site. An additional 6 credit hours must be completed for the degree requirement.

2.7 LEVELLED OBJECTIVES

Year 1	Year 2	Year 3	Year 4
1. Practice holistic nursing by collaborating with individuals within the context of family, to assist them to achieve health and well-being through health promotion and protection.	1. Practice holistic nursing within a variety of settings by collaborating with individuals, families, groups and communities, to assist them to achieve health and well-being through health promotion, protection and maintenance.	1. Practice holistic nursing within a variety of settings by collaborating with individuals, families, groups and communities to assist them to achieve health and well-being through health promotion, protection, maintenance, restoration, and palliation.	1. Practice holistic nursing within a variety of settings by collaborating with individuals, families, groups and communities to assist them to achieve health and well-being through health promotion, prevention, maintenance, restoration and palliation.
2. Discuss caring as an integral dimension of nursing.	2. Demonstrate commitment to caring as an integral dimension of nursing.	2. Integrate the caring ethic as an integral dimension of nursing.	2. Practice the caring ethic as an integral dimension of nursing.
3. Create a caring environment through use of effective communication skills with individuals.	3. Create a caring environment through effective communication with individuals, families, groups and communities.	3. Create a caring environment through effective communication with individuals, families, groups, and communities.	3. Create a caring environment through effective communication with individuals, families, groups and communities.
4. Apply concepts and theories of nursing, arts, and sciences in the care of individuals.	4. Analyze concepts and theories of nursing, arts, and sciences in the care of individuals, families, groups, and communities.	4. Integrate concepts and theories of nursing, arts, and sciences in the care of individuals, families, groups, and communities.	4. Develop an approach to the care of individuals, families, groups and communities which reflects a synthesis of concepts and theories of nursing, sciences, and humanities.
5. Explain the conceptual framework of the collaborative program.	5. Apply concepts of the conceptual framework of the collaborative program to guide nursing practice.	5. Analyze the conceptual framework of the collaborative program in relation to conceptual	5. Create a personal framework for nursing practice.

Year 1	Year 2	Year 3	Year 4
<p>6. Provide competent nursing care to individuals through health promotion and protection.</p> <p>7. Establish priorities in the organization of care in collaboration with individuals.</p> <p>8. Articulate a beginning understanding of the relationship between nursing research and practice.</p> <p>9. Develop beginning critical thinking skills to assist individuals to achieve health and well-being.</p> <p>10. Demonstrate an understanding of the roles and relationships of interprofessional team members.</p> <p>11. Explain the roles of the professional nurse.</p>	<p>6. Provide competent nursing care to individuals, families, groups, and communities through health promotion and protection.</p> <p>7. Establish priorities in the organization of care in collaboration with individuals, families, groups, and communities.</p> <p>8. Use nursing research literature to identify rationale to identify rationale for nursing practice.</p> <p>9. Apply critical thinking skills to assist individuals, families, groups, and communities to achieve health and well-being.</p> <p>10. Participate in collegial relationships as a team member in a learning environment.</p> <p>11. Recognize how nursing roles emerge in relation to health care situations.</p>	<p>frameworks for nursing practice.</p> <p>6. Provide competent nursing care to individuals, families, groups, and communities through health promotion, protection, maintenance, restoration, and palliation.</p> <p>7. Use management and leadership skills to coordinate care with individuals, families, groups, and communities.</p> <p>8. Analyze nursing research literature as it relates to nursing practice.</p> <p>9. Use critical thinking to assist individuals, families, groups and communities to achieve health and well-being.</p> <p>10. Collaborate in collegial relationships with members of the interdisciplinary health care team.</p> <p>11. Assume appropriate nursing roles in relation to health care situations.</p>	<p>6. Provide competent nursing care to meet the health related needs of individuals, families, groups and communities.</p> <p>7. Use management and leadership skills to coordinate and enhance health care within society.</p> <p>8. Foster the extension of nursing knowledge through use of and participation in nursing research.</p> <p>9. Use critical thinking to assist individuals, families, groups and communities to achieve health and well-being.</p> <p>10. Participate in interprofessional practice with health care providers in the delivery of health care.</p> <p>11. Appraise how nursing roles emerge as the needs of society evolve.</p>

Year 1	Year 2	Year 3	Year 4
12. Discuss the legal, ethical and professional standards that guide the practice of nursing.	12. Apply the legal, ethical and professional standards that guide the practice of nursing	12. Analyze nursing practice in relation to legal, ethical and professional standards.	12. Practice nursing in relation to legal, ethical and professional standards.
13. Demonstrate, with guidance, self direction in learning.	13. Demonstrate personal and professional growth through self-directed learning.	13. Accept responsibility for lifelong personal and professional growth through self-directed learning.	13. Accept responsibility for lifelong personal and professional growth using formal and informal strategies for the continuous discovery of knowledge.
14. Articulate a beginning knowledge of the components of the Canadian health care system.	14. Analyze the factors that impact the Canadian health care system.	14. Discuss the interrelationship between nursing and the health care system.	14. Recognize the contributions of the nursing profession in global health affairs.
15. Identify current social, cultural, political, technological, and economic factors which impact on achievement of health and well-being.	15. Discuss the impact of current social, cultural, political, technological, and economic factors on achievement of health and well-being.	15. Examine the need to promote change in health care in response to social, cultural, political, technological and economic factors.	15. Accept responsibility for promotion of change in health care in response to social, cultural, political, technological, and economic factors.

3. STUDENT SERVICES AND RESOURCES

3.1 LEARNING RESOURCE CENTRE AND COMPUTER LAB

The LRC is comprised of the library on the ground floor of the CNS and the computer lab on the first floor. The LRC provides an expanding collection of books, periodicals, A-V and computer software to support CNS curricula and to foster independent learning.

The LRC is an integral part of the CNS and has a major role in facilitation of its educational programs. Its main objective is to provide quality information services and resources for all LRC clients. Instruction in the use of information resources focuses on equipping students with information retrieval and management skills which will enable them to become independent and lifelong learners.

All CNS students are registered with the LRC and have usage and borrowing privileges. Students will be issued an ID card that must be presented when borrowing materials or booking facilities.

Students are encouraged to make use of all services and resources available through the LRC. There is a wealth of material which can be used for independent and self-paced learning by students. LRC staff will be happy to assist students with any questions or problems they may have in locating materials, using reference tools, etc. Students are responsible for following all LRC/Computer Lab policies to ensure equitable access to resources and facilities for all students. Students not adhering to policies may have LRC/Computer Lab privileges revoked.

Hours of Operation

0800-1630 Monday to Friday with some after-hours access to be determined on a semester to semester basis.

Full reference and instructional services are available from 08:30 – 16:30 Monday to Friday. Check with the LRC for exact hours of operation.

To Contact Us:

Circulation Desk - 777-8192

Reference/Administration - 777-8189

Computer Lab - 777-8194

E-mail: karen.hutchens@mun.ca; debbie.oreilly@mun.ca

LRC General Policies

- Polices in the LRC/Computer Lab are kept to a minimum, as our expectations are that students will use these facilities in a responsible and cooperative manner.
- The noise level should not exceed quiet talking. Students should be considerate of others working or studying.
- All materials must be signed out by staff person or student on duty.
- Borrowed materials should be returned promptly so that others are not deprived of access to them.

LRC Circulation Policies

The library catalogue is now available through the Internet. This means that you can search for books and videos in the CNS library from anywhere. To access:

- Go to <http://centrefornursingstudies.ca/Library> Click on Online Catalogue

All materials to be borrowed must be signed out at the Circulation Desk. Borrowed items must be returned by the due date. Students must present CNS ID when borrowing materials or equipment. Students with overdue materials will not be permitted to sign out any materials until overdue items have been returned. Students will be required to pay replacement or repair costs for materials that are lost or damaged.

- Print periodicals (journals and magazines) are for use in the LRC only.
- Books from stacks can be signed out for 2-week or 1-week periods, and may be renewed unless previously reserved.
- Reserve materials are for 2-hour loan and must be used in the LRC. These include vertical files, books and A-V materials which have been placed on Reserve.

LRC Services

Some of the LRC services which students can avail of:

Orientation sessions are provided to all incoming students. These consist of a thorough tour of the LRC/Computer Lab and a review of policies and services.

Circulation Services include checking out materials, renewing materials and placing holds or recalls on needed items.

Reference Services include provision of information regarding collection holdings, services, etc. They also include instruction in use of all software programs, including the Library Online Catalogue.

Interlibrary Loans - Students are responsible for obtaining books and journal articles that are available locally. To obtain materials from outside the province, BN students should check with the Interlibrary Loan Department, Health Sciences Library. The CNS can provide this service at cost. Students should read

Guidelines for Centre for Nursing Studies BN Students Concerning use of MUN Libraries. (Appendix B)

Access to Photocopying Facilities – There are three photocopiers available in the LRC. Two photocopies require a photocopier card. Photocopying cards are sold in \$2, \$5 and \$10 amounts and can be purchased in the library. A \$2 refundable deposit is required for cards. There is one coin-operated photocopier. The photocopiers are located in room G23.

Instruction in the Use of Computerized Reference Tools will be covered in orientation. Further instruction will be provided by staff during regular LRC hours.

Access to A-V Equipment will be available on a limited basis through booking with the LRC. Basic instruction in the use of this equipment will be provided as needed. Borrowing is limited to LRC hours.

Computer Lab

The computer lab is located on the first floor of the CNS. This computer lab is available to all students during LRC hours. Some software programs available to students include word processing, CINAHL, e-mail and Internet access. Four printers are available for students' use. LRC staff provide support to students during LRC hours. Orientation sessions are held to familiarize all new students with the available programs. Lab policies are posted in the Lab and must be adhered to by all students.

Study Rooms

Study Rooms are available for student use when not booked for scheduled learning experiences. Study rooms can be booked through the LRC for one or two hour time periods. Booking times may be further limited at times of high use. Students will need to show their CNS ID to receive a key to a designated room.

3.2 INSTRUCTIONAL RESOURCE CENTRE

For nursing, it is important that the academic program is complemented by practice and experience in real and/or simulated settings. The IRC provides opportunity for simulated learning in both psychomotor competencies and interpersonal skills. IRC staff consists of IRC Coordinator, Simulation Lead and 2 Nursing Instructors. Offices are located on ninth floor.

Facilities and Equipment Available

The IRC is located on the first, ninth and basement floors of the CNS. The IRC rooms simulate both a hospital and clinic environment.

The IRC has various clinical equipment and teaching aids that will be useful resources for student practice and community use. This equipment may be signed out for student use on a short term basis. There is one high fidelity simulator, as well as three medium fidelity and various task trainers.

Lab Policies

- Students who do not comply with the following lab policies will be asked to leave the lab setting.
- Students must dress professionally for lab activities.
- In order to avoid congestion in the lab and outside the lab rooms, students **MUST** keep coats and book bags in their lockers. **Do not sit or leave coats and bags in the corridor outside the lab rooms. Avoid leaving coats or bags in chairs or by elevators, as these behaviors pose a safety risk.**
- You may bring water but no coffee cups or food is permitted in the lab.
- Lab rooms and stations must be tidied before leaving the room.
- Students must come prepared for their lab.
- Please carefully handle and respect the lab equipment.
- Cell phones or electronic messaging and listening devices must be turned off in the lab and stored away.

Dress Code

The IRC simulates a professional clinical environment. Proper attire and footwear for lab activities is required in the lab setting. Please refer to your course outline for required dress.

Practice Rooms and Hours

Practice rooms will be set up on the first and ninth floors. **Students must bring their lab kits when using practice rooms. Equipment and supplies not contained in student lab kits will be available in the designated lab rooms.** These rooms will have supplies and equipment set up that correspond to the lab topic for that week. In order to accommodate all students prior to lab practicums, students are required to sign up for practice times.

Lab Supplies

Students must bring lab kits to required labs. Please do not discard any reusable materials/supplies in the lab. Return all supplies to the original package when you have finished practicing. Needles and sharps must be disposed of in a sharps container. Needles are not to be reused and are only for practice on mannequins.

Returning Students

Students who have been away from clinical can seek remedial help for clinical skills. These sessions will be based on the students' individual learning needs.

Policies for Borrowing and Lending of Equipment

Students must fill out a request form (obtained from table opposite Rm. 921) and give to the IRC Coordinator. The form should be filled out **24 hours** before the equipment is needed. Equipment can be borrowed for one night or a weekend.

Students may be able to borrow equipment for a longer period depending on demand for the item at that particular time. Equipment will be held until 1200.

Equipment must be picked up and returned to the IRC Coordinator. Students take responsibility for the safe return of equipment. If the equipment is damaged the student may have to replace the item.

Missed Labs

Students are expected to attend all the psychomotor skills labs.

3.3 STUDENT HEALTH SERVICES

The Student Wellness and Counselling Centre, located on the fifth floor of the University Centre (Smallwood Student Center, 864-8500) holds regular clinics and provides the same services you would expect from your family physician, with an emphasis on wellness education.

The Student Wellness and Counselling Centre is staffed by a nurse and physician. Appointments are necessary to see the doctor and walk-in patients may be taken if space permits. All services provided are strictly confidential.

Some of the services provided include:

- STD Testing
- HIV Testing
- TB Skin Tests
- Pregnancy Testing
- Health Information
- Immunizations

All students are eligible to participate in the MUNSU Student Health and Dental Plans.

3.4 GUIDANCE AND COUNSELLING SERVICES

Guidance and Counselling services are provided by a qualified Guidance Counsellor and are available to all students enrolled at the CNS. The guidance office is located at the CNS, Ground floor, Southcott Hall.

Services Offered:

- **Individual and/or group counselling** is available in personal, academic and career planning areas.
- **Small group sessions** *designed to meet identified student needs include the following:*
 - ◆ Study Skills, Exam Writing Strategies, Resume Writing, Developing Clinical Confidence, Dealing with Death and Dying, Mindfulness Based Stress Management

- **Career exploration services** are available to any prospective students who think they might benefit from counselling in terms of decision-making regarding nursing as a career.
- **Ongoing assessment and program development** to meet new need areas identified by students and/or faculty.

Accessing Services

An open door, drop-in policy is encouraged. However, in order to ensure a specific appointment time, advance booking is recommended. This may be done in either of the following ways:

- Telephone or email:
- Dawn Lanphear (777-8187) dawn.lanphear@mun.ca
- Write the word “booked” beside a designated time slot on a schedule posted on the Guidance Counsellor’s office door.

Group sessions will be advertised on student bulletin boards. Advance sign-up is recommended as attendance is limited.

Utilization of Services

Student utilization of these services is generally on a voluntary basis. However, students may also be referred to a Guidance Counsellor by a faculty member. In these instances, students work collaboratively with the Guidance Counsellor and faculty member, if necessary, to develop and implement strategies to help resolve the identified problem area. It is the student’s responsibility to set up an appointment time and follow through with the sessions.

Confidentiality

The Guidance and Counselling policy for client/counsellor confidentiality is in accordance with the professional regulations of the Canadian Nurses Association.

Other

Counselling services are also available through Memorial University. The Counselling Centre is located on the 5th floor of the University Centre, Room 5000, telephone 864-8874. Office hours Monday-Friday 0900-1700.

3.5 ACADEMIC ACCOMMODATION

The CNS is committed to providing accommodation to all students who self-identify and have documentation pertaining to a disability. Academic accommodation refers to a change to teaching or evaluation procedures designed to accommodate the particular needs of a student with a disability without compromising academic integrity of the assignment, course, or program. Academic integrity is defined as the demonstration of acquisition of a body of knowledge or the skill normally required for passing a course and/or completing a course or program as determined by the instructor and/or CNS.

As per Memorial University policy, BN (Collaborative) students should contact the Glenn Roy Blundon Centre, University Counseling Centre, with all appropriate documentation, in a timely manner to make a request for accommodation or to request a change in accommodation. Following contact with the Glenn Roy Blundon Centre, Academic Accommodation Request Forms are emailed to the appropriate Program Coordinator. Students are required to discuss their academic accommodation with their instructors, and any others in light of the nature and requirements of the particular assignment, course, or program.

Students can seek the assistance of the CNS Guidance Counselor for support in accessing additional services or agencies available in the community.

Students should consult Memorial University policies for further information related to Accommodations for Students with Disabilities and Procedures for Arranging Student Accommodation.

3.6 DEVELOPING SCHOLARLY WRITING SKILLS

Developing scholarly writing skills is a critical component of the BN (Collaborative) Program. CNS faculty have developed a resource entitled “Handbook for Developing Scholarly Writing Skills” which provides students with guidance in the following areas:

- Improving Writing Skills (including APA Editorial Style)
- Leveling Writing Skills Across the Curriculum
- Identifying Resources to Assist with Writing Assignments

3.7 ACADEMIC ADVISING

Students requiring academic advising should initially contact the appropriate Program Coordinator or the Associate Director, BN (Collaborative) Program, CNS. Program inquiries made at the Office of the Registrar, Memorial University must be directed to the Assistant Registrar responsible for Nursing.

3.8 STUDENT ORGANIZATIONS

Students at the CNS will have the opportunity for participation in a number of student organizations.

3.8.1 MUN Students’ Union

The MUN Students’ Union (MUNSU), which represents more than 14,000 undergraduate students, is elected each spring by the student body at Memorial. The council exists for the purpose of making students’ concerns heard and providing input into all administrative and academic decisions with these concerns in mind.

All students become members of the MUNSU by virtue of the fees paid upon registration.

MUNSU also has affiliation with the Newfoundland and Labrador Federation of Students (NLFS) and the Canadian Federation of Students (CFS).

3.8.2 Nursing Society

As students within the school of nursing, you will have the opportunity to become members of the Nursing Society that will be recognized by and have representation on the Memorial University of Newfoundland Students Union (MUNSU).

The purposes of the nursing society are to:

- promote interest in extracurricular nursing activities
- promote unity among the nursing student body and to act as a liaison between nursing students, faculty and other student organizations
- provide a forum through which students can express their opinions on issues in nursing
- encourage participation in professional and liberal education

The annual Nursing Society fee is collected in September.

The Nursing Society Constitution is contained in Appendix A of the Student Handbook.

3.8.3 Canadian Nursing Students' Association

The purpose of the organization is to promote professionalism among nursing students. CNSA aims to bring issues of relevance in our field to the attention of student nurses and to make students more aware of the legal, moral, professional, and educational problems that are a large part of nursing and that must be faced now rather than when students become licensed or registered.

How does CNSA fulfill this purpose?

- Provides a communication link among baccalaureate nursing students across Canada
- Acts as the official voice of baccalaureate nursing students
- Provides a medium through which members can express their opinions on nursing issues
- Encourages participation in professional and liberal education
- Maintains a direct link with other organizations concerned with nursing:
 - Canadian Nursing Association
 - Canadian Association of University Schools of Nursing
 - Provincial Nursing Associations
 - National Student Nurses Association in the U.S.
 - International Council of Nursing
- Enhances the awareness of need for nursing research

The CNS, as a member of the CNSA elects an Official and Associate Delegate to the organization each year.

3.8.4 Class Executive

Students in each year of the program elect their own class executives who assume responsibility for conducting the affairs of the class and for organizing class activities, fundraising events, etc.

3.9 CNS SUPPORT FOR STUDENT PROFESSIONAL DEVELOPMENT

The faculty of the school are supportive of student efforts to participate in professional development activities. The following guidelines clarify how support of nursing students, who participate in CNSA activities, will be demonstrated.

Guidelines:

- Students will inform their professor/instructors, in writing, of their desire to attend a CNSA conference/activity, not later than **four** weeks prior to the CNSA conference/activity. Since the student may not be able to identify the exact date of the conference in the letter of intent it is important to inform faculty of intent as early as possible in the semester.
- Students attending the conference will normally be excused from clinical during the time period of the CNSA conference/activity without that time being considered missed time.
- Faculty have the right to refuse a request for excused time from clinical if the faculty member has determined that the student's clinical performance is weak.
- Faculty refusing a request for excused clinical time must provide the student with written documentation which supports this refusal.
- The learning experience gained as a result of attending such conferences/activities, may in collaboration with faculty be incorporated as an evaluation component of the course for that student.
- Students will collaborate, as necessary, with LRC instructors for the purpose of rescheduling lab testing/re-testing.
- It is the student's responsibility to ensure that missed class and /or lab content is acquired independently.
- Students will collaborate, as necessary, with professors to determine appropriate rescheduling of dates for the completion of assignments and/or exams.
- There is a total of \$1000.00 available to support professional activities, to be vetted through the Nursing Society.

3.10 STUDENT REPRESENTATION ON CNS COMMITTEES

The CNS is committed to enabling student representation on standing committees of the school. Faculty value student participation on these committees, which are useful forums for promoting communication among students and faculty.

Student representatives sit on the following committees:

- Academic Council
- Undergraduate Studies Committee
- Learning Resource Committee

4. ACADEMIC REGULATIONS AND GUIDELINES

4.1 GENERAL ACADEMIC REGULATIONS (MEMORIAL UNIVERSITY)

The BN (Collaborative) Program is governed by the rules and regulations passed by the Senate of Memorial University. These are outlined in the current University Calendar. Students should become familiar with academic regulations pertaining to their program and are advised to make a point of reading the General Academic Regulations (Undergraduate), in the current University Calendar. These regulations are also readily accessed at the MUN website:

www.mun.ca/regoff/calendar.

4.2 ACADEMIC STANDARDS AND PROMOTIONS

The general regulations governing the BN (Collaborative) Program are outlined in the School of Nursing section of the current University Calendar. These regulations can also be accessed on the web at www.mun.ca/regoff/calendar; go to School of Nursing then Four Year Bachelor of Nursing (Collaborative) Program. These general regulations outline the “**Academic Standards and Promotions**” for the Program.

It is critical that students become familiar with these regulations which outline the passing grade for nursing courses and other requirements related to continuance in the program. Students should note that a grade of at least 65% or a grade of PASS, as appropriate, is required in each of the Nursing courses required for the degree.

4.3 SUPPLEMENTARY EXAMINATIONS

Any student receiving a grade of 60% in a Nursing course is eligible to write a supplementary examination in that course. Only three supplementary examinations in Nursing courses can be written during the program. Further guidelines related to supplementary exams in the BN (Collaborative) Program are outlined in the School of Nursing section of the current University Calendar or at

www.mun.ca/regoff/calendar.

4.4 FAILURE IN NURSING COURSES: NOTIFICATION OF STUDENTS

The following outlines the process for notification of students who fail a nursing course.

Fall Semester Failure

Students who fail a Fall Semester nursing course will receive their grade via the MUN telephone or web access once grades are officially released by the University.

Winter Semester Failure

Students who fail a Winter Semester nursing course will receive notification via their MUN e-mail accounts once the grades are approved by the Director.

The e-mail notification will also include notification of supplementary exam eligibility or ineligibility.

All students should check their MUN e-mail accounts daily for the first week following their last nursing exam.

Students must not telephone the Associate Director, CNS Registrar or their course leader for their grade.

4.5 STUDENT DECISION MAKING IN THE EVENT OF A FAILED NURSING GRADE

Students ***should*** initiate appropriate action in response to the knowledge that they have failed a nursing course(s) by attending to the information contained in this document and relevant sections of the current University Calendar (MUN website).

It is strongly recommended that any student who does not have access to the web during the Christmas break should have a copy of the current University Calendar in his/her possession.

What to do in the case of a failure in a nursing course if you are a student in the regular four year stream of the BN (Collaborative) program:

1. ACADEMIC STANDARDS AND PROMOTIONS of the BN (Collaborative) Program identify a passing grade as 65%. Therefore you have failed a nursing course if this grade is not achieved.
2. If your grade is 59% or less, you will have to repeat the course next year. If the failed course is a pre-requisite to Winter Semester course(s) NURS 1520 or NURS 2520, you will not be able to take those courses. You can determine pre-requisites by referring to the course list at the end of the School of Nursing section in the University Calendar. Any student in this situation should immediately make an appointment with the appropriate Program Coordinator in order to be advised about a new program of studies plan.
3. If your grade is at least 60% through 64%, you **MAY** be eligible for a supplementary exam.
 - Only three supplementary examinations in nursing courses can be written during the program.
 - If you have written fewer than three supplementary exams and your grade is at least 60% through 64%, send the Coordinator an e-mail stating your intent to write a supplementary. There is a fee for writing a supplementary.

Fees can be found on the website <http://www.mun.ca/regoff/calendar/> under University Regulations: **FEES AND CHARGES PERTAINING TO APPEALS**. Please note: CNS students pay their fee to the CNS Business Officer – Office 1032, CNS. This must be paid before the supplementary exam writing date.

- If you have already written three supplementary exams, you are not eligible to write a fourth one. If this represents your situation and the failed course is a pre-requisite to Winter Semester course(s) NURS 1520 or NURS 2520, you will not be able to take those courses. Any student in this situation should immediately make an appointment with the appropriate Program Coordinator in order to be advised about a new program of studies plan.
 - A student may write a supplementary examination for any one course only once. If you have already written a supplementary exam for the failed course in a previous year, you are not eligible to write another supplementary in the same course. A second failure in a given nursing course requires withdrawal from the BN (Collaborative) Program. Any student in this situation should make an appointment with the Associate Director.
 - Failure in excess of two nursing courses during the program results in mandatory withdrawal from the BN (Collaborative) Program.
4. Students have certain rights regarding final examinations. Please refer to the website <http://www.mun.ca/regoff/calendar/> under University Regulations, General Academic Regulations for additional information regarding the following topics:
- Examinations:
 - Access to Final Examination Scripts
 - Rereading of Final Examination Scripts
5. Students have the right to appeal regulations. Please refer to the website <http://www.mun.ca/regoff/calendar/> under University Regulations, General Academic Regulations for additional information regarding the following topics:
- Appeal of Regulations:
 - General Information
 - Appeal Procedures
 - Information Required in Letters of Appeal
 - Information Required for Medical Certificates

NB: Any student who wishes to initiate an appeal should submit the appropriate information outlined above to:

Anne Marie Tracey
 Associate Director, BN (Collaborative) Program
 Office 1125, CNS
anne.marie.tracey@mun.ca

6. Supplementary exam dates will be communicated to all students via e-mail before the last class day each semester. Fall semester supplementary exams will normally be scheduled the week preceding the start of Winter semester. Winter semester supplementary exams will normally be held within a week of the last nursing exam.

4.6 EXAMINATIONS (TERM TESTS, MIDTERMS & FINAL EXAMINATIONS)

4.6.1 Examination Schedules

The dates for final examinations are published in the Memorial University Calendar for the full academic year. The dates for term and/or lab exams are provided during each course orientation.

Students should not make travel arrangements that conflict with the examination schedule for each semester. The CNS will not grant deferred exams to students who fail to comply with this directive. Neither will the CNS assume responsibility for travel arrangements made for students by family or friends.

Supplementary and deferred exams for the Fall semester will normally be scheduled the week preceding the start of the Winter semester. Winter semester supplementary and deferred exams will normally be held within a week of the last scheduled nursing exam.

4.6.2 Centre for Nursing Studies Regulations Governing the Writing of Examinations

All nursing examinations will be written at the CNS. The General Academic Regulations (Undergraduate) of the current University Calendar governs the writing of the CNS nursing exams.

The following additional regulations will apply:

- All students are required to sit for the exam at the time scheduled for the writing.
- Photo ID's must be worn to all examinations completed at the Centre.
- Brief cases, textbooks, binders, handbags, etc. are not permitted in the exam room.
- Caps of any sort are not to be worn during exams.
- Smart phones, electronic translators and other electronic devices are **NOT** permitted in the exam room. A basic calculator may be permitted at the discretion of the course professor.
- No exam materials of any kind, including any scrap paper, are to be removed from the examination room.

Important: Student Questions During Exams

- Faculty will not answer any questions regarding content.
- Faculty will not define words/explain any phrases pertaining to content.
- Faculty will only answer questions related to a perceived error on an exam.

4.6.3 Student Feedback Following Examinations

Students who wish to request specific feedback following the release of term exams/papers/assignments should approach the faculty member within four

working days following the release of grades or assignments. Feedback will be provided at faculty discretion.

Section 6.8.3 of the General Academic Regulations (Undergraduate) of the MUN Calendar outlines the process for student access to final examination scripts.

4.6.4 Guidelines for Re-Reads of Final Examinations

A student who makes an inquiry about the re-reading of final examination scripts is referred to the University Calendar, “General Academic Regulations (Undergraduate): Regulation **6.8.4 Rereading of Final Examination Scripts**”. This regulation applies to final examinations only. A formal application must be made to the Office of the Registrar for a re-read to occur.

Once the School has received a request for a re-read from the Office of the Registrar the following process will occur:

1. The Director, who normally would receive the request, will delegate the responsibility to conduct the re-read to the Associate Director.
2. The Associate Director will contact the relevant course professor to request the following:
 - a. Final examination script of the student who made application for the re-read
 - b. The grading key for the examination; alternatively, a selection of other graded final examination scripts from the same cohort can be obtained which demonstrate an A, B, C, F range of awarded grades
3. The script of the student who requested the re-read will remain unaltered but the original will be copied. All comments and marks made by the course professor will be removed by white-out on copy. That copy will then be re-copied, thus resembling as closely as possible the original script submitted by the student. It is this copy that will be given to the professor selected to re-read the script.
4. The Associate Director will contact an appropriate professor to re-read the script in question.
5. An ‘appropriate’ professor will be one who has taught the same or a similar course. That professor may be another faculty member of the same School of Nursing or a faculty member at one of the collaborative partner sites.
6. Once a professor has agreed to re-read the script, (s)he will be given the ‘copy’ as previously defined, the grading key, and/or a sample of unaltered, original scripts that reflect a range of grades from A through F.
7. There will be no collaboration between the course professor and the re-read professor during this process.
8. The professor who conducts the re-read will submit his evaluation and grade for the script to the Associate Director and will return all pertinent documents. The professor will be expected to grade the re-read script within 48 hours.
9. The Associate Director will complete the appropriate change of grade section on the re-read request form, and will return it to the Office of the Registrar.

Recalculation of the Grade following the Re-read

Students should be advised that the outcome of a re-read may either improve or lower their grade.

The grade awarded by the professor designated to re-read the exam will be substituted for the original grade on the same evaluation component. The student's final mark will then be re-calculated. If the mark on the re-read script is higher, thus improving the final grade, that mark will be submitted on the re-read request form.

If the mark on the re-read script is lower, thus reducing the final grade, that mark will be submitted on the re-read request form.

NOTE: For all other examinations and assignments associated with a course, this regulation would not apply. Students who request re-reads of such evaluation components will be advised that re-reads do not normally occur. If a student has a concern about an examination that was not a final examination or an assignment, the appropriate action to take is to make an appointment with the relevant course professor to communicate those concerns.

4.7 DEFERRED EXAMINATIONS

Provision for deferred **final** examination will be made in accordance with the guidelines outlined in the MUN Calendar General Academic Regulations (Undergraduates) **Section 6.8.2**.

Throughout the semester deferred course examinations are permitted only under extraordinary circumstances. In cases of illness, a medical certificate from the student's physician is required.

Students unable to sit for a scheduled course examination are requested to notify the faculty member **prior** to the scheduled writing time.

When a student misses a scheduled course examination, the provision of an alternate method of evaluation will be at the discretion of faculty.

During the Fall and Winter Semesters, in situations where exams for non-nursing courses coincide with scheduled clinical experiences, students are requested to contact the faculty member and request a deferred exam.

4.8 RELEASE OF GRADES DURING THE SEMESTER

Grades will not be released to students by phone. Students obtain term test results from their D2L account.

Students are **not** to request grades for other students.

4.9 CHALLENGE FOR CREDIT GUIDELINES

The Schools of Nursing offer a *limited* opportunity for **Challenge for Credit** within the BN (Collaborative) program. Memorial University's Challenge for Credit regulation is found at www.mun.ca/regoff/calendar under

Admission/ReAdmission to the University (Undergraduate). The regulation is **4.5.1, Challenge for Credit.**

Students of the BN (Collaborative) program who are also licensed practical nurses will be given the opportunity to **Challenge for Credit** NURS 1520, NURS 1017 and NURS 1003. Students who choose to apply for the challenge for credit should follow the university regulation and arrange to meet with the Associate Director.

Additionally, such students will be advised of the fee associated with the challenge and the consequences of a failed challenge. Students who fail the challenge will be given the opportunity to immediately register for the challenged course and to continue that course within the assigned group. They will be responsible for paying the full tuition for that course AS WELL AS the fee associated with the failed challenge.

4.10 FAST TRACK OPTION OF THE BN (COLLABORATIVE) PROGRAM

The CNS does not deliver the Fast-Track Option of the BN (Collaborative) Program; however, most years there are a limited number of seats available for potential transfer of students from the 4-year stream BN (Collaborative) Program. As well, at times it is possible for students who have failed a course in the 4-year stream of the BN (Collaborative) Program to register for a Fast-Track course in order to continue with the regular course sequencing of the four year program.

The following are guidelines for these two scenarios of either a) transfer to the Fast-Track option or b) registration in a course of the Fast-Track Option.

4.10.1 Applicants From the 4-year Stream Applying for Transfer to the Fast – Track Option

1. In early winter semester, second year regular stream students at each site will be advised of a March 1 deadline to apply for transfer to the fast-track option, by the Associate Director of each site. Students will be cautioned that while applications will be accepted until March 1, there is no guarantee that seats will be available to fill (that information will not be available from Administrative Council until the end of the winter semester).
2. Students will direct a letter of request to transfer to the fast-track option to the Associate Director of their site.
3. Associate Directors will take responsibility for advising students of their eligibility to apply. The students will be advised that they **must** satisfy all admission requirements outlined in the MUN Calendar for the fast-track option.
4. Students who fail a Nursing course in the regular-stream of the BN (Collaborative) program are NOT eligible to apply for transfer. Students **must** satisfy the requirements for transfer into the fast-track option by the end of the Winter semester in which they have made application to the fast-track option.

5. Students shall be advised that when vacancies arise in the fast-track option, students from the St. John's area (CNS and MUNSON) compete for vacancies at MUNSON. Students from the Corner Brook area (WRSON) compete for vacancies at WRSON. If all seats are not filled using this process offers will be extended to students from the other city.
6. The Associate Directors will review and recommend transfers.
7. The Associate Directors will notify students of their decision.

4.10.2 Regular 4-Year Stream Students Who Have Failed Courses

Premise: Students are permitted access to Fast Track courses, as resources allow, to enable continued sequencing with his/her regular stream cohort.

1. Student must have been eligible for a supplementary examination in the course.
2. Student must have no failures in any other courses (nursing or non-nursing) in the same semester.
3. Student must be provided with guidance before making the decision to repeat a course with the Fast Track. That guidance will include:
 - Caution that success in the repeated course will not guarantee admission to additional Fast Track courses, especially linked classroom/clinical courses as clinical course availability is dependant on resource availability (placements and faculty).
 - The option to repeat a course with the Fast Track is given only *once*.
 - A second failure in the same course (having been repeated with the Fast Track and failed) will result in the normal application of ACADEMIC STANDARDS AND PROMOTIONS. This may mean that a student will be unable to progress in the program for a period of at least four semesters given the yearly availability of regular stream courses.
4. Resources must be available to accommodate the student.
5. Students are eligible for seats only in the city where they currently attend the BN (Collaborative) program.
6. If available seat(s) are opened to competition then students will be ranked according to the final grade achieved in the failing course. Those students with the highest grade in the failed course (either by original final exam or supplementary exam-whichever gives the student the higher overall course grade) will be given the highest ranking. In the case of a tie the academic average in nursing program will be used to award the seat.

4.11 TRANSFER TO A PARTNER SITE DELIVERING THE BN (COLLABORATIVE) PROGRAM

Students may request a transfer to another site (i.e. Memorial University School of Nursing or Western Regional School of Nursing) if they are experiencing extenuating circumstances (such as the illness of a family member). The granting of a transfer is dependant on the resources available at the requested site which may not always be immediately available. Transfers can only occur at the end of each academic year. This is due to the fact that courses will be offered during the same

year at all sites, but the semester of course offering may vary with each site. Students should follow the following process when requesting a transfer:

1. Transfer requests should be made in writing to the Associate Director of the school he/she is currently attending.
2. Transfer request letters should clearly state the extenuating circumstance and provide appropriate documentation.
3. A copy of the student's transcript indicating progress to date, should accompany the request.
4. The Associate Director sends the request to the receiving site to be considered as soon as possible.
5. The student, Associate Director and Registrar are notified of the outcome as soon as possible.
6. If the request is granted, a copy of the student's file is sent to the receiving site.

4.12 GUIDELINES FOR STUDENTS RETURNING TO THE PROGRAM AFTER A PERIOD OF ABSENCE

1. Students who withdraw from a course/semester for medical reasons must provide proof of medical clearance before resuming studies.
2. Returning students will be asked to provide the following documentation; a) up-to-date immunization record; b) current CPR-HCP (health care provider) Certificate; c) Certificate of Conduct; with vulnerable sectors check.
3. All policies outlined in the current University Calendar, Academic Standards and Promotion and Supplementary Exam Sections for the BN (Collaborative) Program will apply from the time of the students' INITIAL admission to the program.
4. Students wishing to register for nursing courses are required to notify the Associate Director by May 1st for Fall semester registration and by November 1st for Winter semester registration.
5. If at any time during a period of absence the student decides not to continue with the nursing program, the student is asked to notify the school in writing.
6. Students wishing to do so may access the services of the CNS Guidance Counsellor during a period of absence from the Program.

4.13 APPEALS

The regulations governing appeals are included in Section **6.15** "Appeal of Decisions" of the General Academic Regulations (Undergraduates), current University Calendar.

Students wishing to obtain initial information about the appeals process should consult with the Associate Director, BN (Collaborative) Program, Centre for Nursing Studies.

Appeals are to be submitted to the Chair, Committee on Undergraduate Studies, CNS.

In the event that an appeal is denied, the student will be advised of the next avenue of appeal that may be taken.

Students with an appeal in progress may attend classes and labs but are not permitted to attend clinical experience in a course for which they are not registered.

As per University policies, grades awarded in individual courses cannot be appealed. Dissatisfaction with grades is not sufficient grounds for an appeal.

4.14 ACADEMIC MISCONDUCT

Students in the BN (Collaborative) Program at the CNS are governed by the regulations for Academic Misconduct as outlined in Section 6.11 of the General Academic Regulations (Undergraduate) of the current University Calendar. Students should become familiar with those actions that could be considered an Academic offence.

4.15 POLICY FOR MISSED NURSING LABS

Students unable to attend a lab should notify their lab faculty member **prior** to missing the lab. If lab absenteeism is a pattern, a student may be asked to provide supporting documentation in order to write a missed pretest/post-test. It is the student's responsibility to make arrangements with the assigned lab faculty member to write the missed pretest/post-test, if applicable. **This must be arranged within one week of the missed lab.**

4.16 STUDENTS CONDUCTING SURVEYS AS PART OF NURSING COURSES

Any student who conducts a survey questionnaire as part of a nursing course assignment is responsible to bring the questionnaire to the attention of the course leader for review prior to distribution.

Additionally, the questionnaire must include the following statement:

This questionnaire is part of a course at the Centre for Nursing Studies (include course name and number). It is not part of a research study. Professor (faculty member's name) reviewed this questionnaire with me and it has been approved for the purposes of this course. The information collected will be used only for the course and you will not be able to be identified.

4.17 EXTENSION OF ASSIGNMENT DEADLINES

Assignment deadlines will be extended only under extraordinary circumstances. Students requesting such consideration are expected to contact the faculty member prior to the due date. The granting of extensions will be at the discretion of faculty.

4.18 DEAN'S LIST

Memorial University acknowledges the academic success of its students in various ways. One of these is by naming students to the appropriate deans or vice-president's list. Annually, every academic unit will name to its list a maximum of **10%** percent of its students, selected on the basis of academic performance in the nominating period. The nominating period shall be the Spring, Fall, and Winter Semesters immediately preceding the nomination, which will occur at the end of the Winter Semester. Minimum criteria for admission to such lists are the following:

1. A GPA of at least 3.5 in the credit hours completed in the preceding Spring, Fall and Winter Semesters.
2. Attendance as a full time student in at least two of the three semesters in the nominating period.
3. **Successful completion of at least 27 credit hours over the nominating period, although an academic unit may require that the 27 credit hours be completed in any two of three semesters in the nominating period. *Note: In consideration of specific programme requirements, individual academic units may include students who have successfully completed, over the nominating period, a course load other than 27 credit hours, but which is consistent with the course load defined by the programme.***

Students will receive a letter of congratulations from the Director.

A notation will be placed on the student's transcript indicating that the student has been named to the list.

5. CLINICAL POLICIES

5.1 ORIENTATION TO CLINICAL COURSES

An orientation session will be provided at the beginning of each clinical course. This session will include information related to

- teaching faculty
- course objectives
- client populations
- clinical rotations and clinical hours
- method of evaluation/evaluation tools
- assignment guidelines
- course materials
- accessing information related to clinical agencies
 - policies
 - dress code
 - parking arrangements
 - food service arrangements
 - security of personal belongings

5.2 REGISTRATION AND START DATES FOR CLINICAL COURSES

Students are not permitted to attend clinical learning experiences unless they are registered for the clinical course. Students who have not met the pre-clinical requirements will be de-registered from the course.

Students are not permitted to begin clinical experiences earlier than the scheduled date unless permission has been granted by the Committee on Undergraduate Studies for the BN (Collaborative) Program.

5.3 ATTENDANCE

Prolonged/excess absence from scheduled clinical learning experiences normally requires some form of documentation. Regardless of the evidence provided for clinical absenteeism, the student must ultimately demonstrate successful achievement of the objectives specified for each nursing practice course. Failure to demonstrate an acceptable level of clinical competency may result in failure or a request to withdraw from the course.

The faculty member is able to appraise clinical progress only when the student is present for scheduled clinical opportunities. A student's absence from clinical may seriously affect the amount and/or quality of information which can be used to assess student progress and complete his/her evaluation.

Clinical opportunities are inclusive of:

- attendance in clinical
- preparation for/participation in conferences
- individual meetings at the discretion of the faculty member

5.4 CLINICAL PLACEMENTS AND SCHEDULING

Nursing Education Program Clinical Experience Responsibilities

Basic nursing education programs prepare generalists to engage in entry-level nursing practice. The Undergraduate Nursing Program:

- provides students with the opportunities to acquire the knowledge, skills, and attitudes required for entry-level practice and pursue life-long learning (Association of Registered Nurses of Newfoundland and Labrador (ARNNL, 2006; ARNNL 2013a; ARNNL 2013b; CASN 2014);
- ensures that student practice learning experiences reflect national and jurisdictional standards and prepares graduates to achieve entry-level competencies (ARNNL, 2013; CASN 2014);
- works in partnership with health care settings to ensure that students have access to quality practice learning experiences (ARNNL, 2013);
- is committed to providing the clinical experiences necessary to prepare students for entry-level scope of practice primarily through the use of medical and surgical clinical areas.

Clinical Placement Assignments

1. Clinical placements will be assigned by the School of Nursing for clinical courses throughout the program.
 - a. Group clinical courses will use a variety of clinical areas to support learning.
 - b. The primary foci of clinical experiences in N3523 and N4516 will be medical and surgical clinical areas.
2. Students may submit requests for placements outside St. John's or Corner Brook (city of site of study respectively), within or outside Newfoundland and Labrador for N3523, N4512 and N4516.
3. Students cannot submit requests for unit/hospital-specific placements within their site of study city (St. John's or Corner Brook respectively).
4. It is the decision of the School of Nursing to approve student placements.
5. Placements may be changed at any time due to unforeseen circumstances.

Approval Criteria for Clinical Placements

The following will be used to determine clinical placement assignments:

- Clinical placement history
- Academic performance in courses completed to date
- Clinical performance throughout the program; this includes nursing practice appraisal comments, consideration of learning plans, med errors, occurrence reports, sick time, etc.
- Student's professional behaviour demonstrated throughout the program

In addition, the following will be used to determine students' eligibility for clinical placements outside the St. John's and Corner Brook areas and outside of the province.

- Student must have had no previous clinical failures throughout the program.
- Pre-clinical placement requirements must have been met by the last day of class of the preceding semester to receive approval for an out of city/out of province placement, regardless of whether or not the placement is confirmed by the agency.

5.5 REPORTING OF ABSENTEEISM

Students unable to attend a scheduled clinical activity must notify the clinical agency and assigned faculty member prior to commencement of the scheduled shift.

5.6 PREPARATION FOR CLINICAL ASSIGNMENTS

Students are expected to be prepared for all clinical learning experiences and to meet clinical course assignment deadlines. Failure to demonstrate adequate preparation may result in the student being asked to leave the clinical area.

5.7 CLINICAL AGENCY POLICY GUIDELINES

Students will follow the policy and procedures of the agency in which the clinical learning experience is being provided.

5.8 BN STUDENT MEDICATION ADMINISTRATION POLICY

Students may administer medications at their level of competency as they progress through the program.

- In clinical courses where there is direct supervision by a clinical instructor from the school of nursing, competency level is determined by the student and the clinical instructor.
- In clinical courses where there is no direct supervision by a clinical instructor from the school of nursing, competency is determined by the student and the preceptor/co-assigned Registered Nurse.

In addition, students are expected to comply with all agency policies regarding medication administration.

High Alert Medications

The Schools of Nursing, in an effort to promote client safety and decrease the likelihood of medication errors, follow the recommendations of the Institute for Safe Medication Practices (ISMP). High alert medications are described by the ISMP as “drugs that bear a heightened risk of causing significant patient harm when they are used in error” (ISMP, 2014).

Medications that are designated as **high alert** require an independent double check before administration. An independent double check is a process in which the student and Registered Nurse will separately check each component of prescribing, dispensing, and verifying the high alert medication before administering it to the patient (ISMP, 2008). In addition, both the student and Registered Nurse are required to sign the medication record.

When **deemed competent** a student may perform an independent double check.

Students **cannot** independently double check medications prepared by another student.

Students are expected to comply with agency policy regarding medications designated as high alert. In addition, if not indicated in agency policy, the following medications must be treated as high alert:

- All Antithrombotics (including anticoagulants and thrombolytics)
- Insulin
- Controlled Substances (as identified in agency policy)
- All Narcotics

5.9 ACCOUNTABILITY

Students are expected to have the knowledge, skill and judgment to perform safely, effectively and ethically in the clinical setting. Adequate preparation for clinical practice shall normally include prior attendance at the skills labs and seminars in which nursing competencies are learned. The decision to permit a student to perform a skill prior to completion of a nursing lab will be at the discretion of faculty. Such skills may be undertaken only under the direct supervision of the faculty member.

Students are responsible and accountable for the standard of care provided within the competency level at which they are prepared. Students are accountable to know the limits of their competency and to work within these limitations. Students are expected to identify situations where assistance is required, seek appropriate direction and supervision and to be aware of unit policies regarding student practice.

Faculty will be available for guidance and/or supervision. In the absence of the faculty member, students who have completed the required skills lab may request guidance from the agency personnel to whom they have been directed by faculty.

A student performing a psychomotor skill for the first time should check with faculty to determine if supervision is required.

In new or unusual situations, students must consult with faculty.

5.10 MEDITECH PASSWORD POLICY

An initial Meditech password will be issued to students either in NURS1520 or NURS 2502 clinical courses. This password will be needed for the remainder of the BN program and will be necessary for the student to complete clinical with Eastern Health. Access to this computer system is vital for students to complete preparation forms, communication and documenting their patient care. A student **MUST NOT** access the system using another student, staff or faculty password. It is important that students keep their password in a safe and secure place (NOT on the back of their ID) and log in on each clinical day. Students can log on in the computer lab here at the CNS during semesters they are not in clinical.

The following outlines the process that should be followed for student Meditech passwords:

Students will fill out an application for a Meditech password. The forms are sent to the IM&T department and the students will receive an initial password from IM&T. Students are now required to choose their own password and have it ready to enter. New alpha-numeric passwords must be 8 characters in length and include at least one number. The clinical faculty will be responsible to help the students with their first login to the system.

When a student enters the system for the first time, he/she will be asked to re-enter the password. When the password is reentered, nothing will appear in the block. If the password is typed correctly, the message VERIFIED will appear.

If students are having difficulty with their passwords or Meditech menu, they should contact Paula Fifield at 777-7194 or by email, paula.fifield@mun.ca or Laura Keough at 777-8164 or by email, laura.keough@mun.ca .

5.10.1 Process for a Replacement Meditech Password

Loss of a Meditech password is a serious incident, as this could compromise patient confidentiality. Obtaining a new password is time intensive and requires a coordinated effort between the CNS and the HTDM (Healthcare Technology and Data Management) department. The process for requesting a new password is as follows:

1. Schedule an appointment to see Laura Keough, Office 1111, Southcott Hall. Email and telephone requests will not be accepted, unless exceptional circumstances apply.
2. Complete the “HTDM Computer Password Form” including full signature and MUN number. This must be completed legibly and in ink.
3. Complete an “Incident Report”. The incident form is required as patient confidentiality has potentially been compromised. This form will be retained on the student’s file.
4. Submit a replacement fee of \$20.00

Always keep your password in a safe place!

5.11 CO-ASSIGNMENT OF STUDENTS

Students in clinical settings are co-assigned to patients/clients with a staff member of the institution. Students are to report to these staff members at the end of the clinical experience and when leaving the unit at any time during the day.

5.12 CONFIDENTIALITY

All matters pertaining to clients/patients/residents are to be held in the strictest confidence. Any verbal or written identification beyond that necessary for professional communication is considered a serious breach of ethical and legal principles. **This includes postings on social media, such as Facebook.**

Violations of standards related to confidentiality will be considered a serious clinical incident and will be dealt with accordingly.

5.13 PRE-CLINICAL PLACEMENT REQUIREMENTS

Please refer to the *Student Pre-Clinical Requirements* booklet for further information. MUN Student Health Centre holds regular clinics and provides the same services offered through a family physician. Appointments are required – 864-7597.

Students are **not** permitted in the clinical setting if the required documents are not on the students' file i.e.: current CPR. Students unable to meet these requirements may therefore be delayed or prevented from completing the nursing program.

5.14 FIT TESTING

All students are required to undergo protective mask fit testing prior to clinical placements and to ensure testing is repeated every two years.

5.15 CLINICAL DRESS CODE

The purpose of the clinical dress code is to assist the student to identify the boundaries for personal decision making regarding professional dress and grooming. These guidelines reflect recognition that clients' perceptions of the profession of nursing are influenced in part by how nurses display a professional image in all practice settings. These guidelines also reflect the boundaries that are acceptable to agencies that provide clinical placements for students in the BN (Collaborative) Program. Students are also referred to ARNNL's position statement "Professionalism and the Registered Nurse" at www.arnnl.ca

Students who do not comply with the clinical dress code will be asked to leave the clinical setting.

A. Personal Grooming

In keeping with principles of infection control and a professional image, the following guidelines apply to personal grooming:

Hair

Hair must be neatly groomed. Hair longer than shoulder length must be tied back. Hair ornaments must be small and neutral in color. Whether short or long, hair should not hang in the face or over the eyes when leaning forward.

Make Up

An overall neutral look is permitted.

Nails

Fingernails must be short and neatly groomed. Artificial nails, nail enhancements and nail polish are prohibited.

Jewelry

For purposes of infection control and student/client safety, the following guidelines apply:

- No rings are permitted.
- Small stud earrings, to a maximum of two per ear only, are permitted. In relation to body piercing, no other visible jewelry is permitted. Neutral, solid spacers are permitted.
- Wrist or brooch style watch is permitted. Wrist watches must be removed during client care and when hand washing.

Perfumes/Scents

Because of the increasing incidence of allergies within the general population, the use of scents is not permitted. This policy is strictly enforced and is inclusive of perfume, aftershave, and scented products such as lotion, soap, hair spray, deodorant and powder. In the interest of clients and colleagues who experience allergic reactions, students are also asked to use non-scented products and to avoid offensive odors such as cigarette smoke on clothing.

B. Clinical Uniform Attire

Uniforms are required for clinical practice within a hospital or nursing home environment. Students are required to purchase their own uniforms. A minimum of two uniforms is needed to satisfy the usual requirements of most clinical courses. Uniform selection should be made in accordance with the following guidelines:

Standard Uniform

Navy blue pants and a white top are required. Warm up jackets must be white. Long-sleeved tee-shirts under the uniform are not permitted.

The uniform must accommodate the freedom of body movement needed to perform tasks in a manner that will prevent injury. It should be roomy and loose fitting. It should have pockets large enough to hold items such as a small note pad, pen, and scissors.

The clinical uniform must be standard uniform apparel and professional in appearance. Tops should extend beyond the top of the leg and provide full coverage during movement.

Footwear

Footwear is considered part of uniform attire. A standard “duty” shoe or footwear of a sports shoe/sneaker variety is required. Footwear must be primarily white. The shoe must be closed at the toe and heel. Clinical uniform footwear must **NOT** be worn outside the clinical area.

Lab Coats/Warm-Up Jackets for Clinical Area

Students are required to wear a lab coat or warm-up jacket when in client care areas and not in uniform. Under no circumstances are students to wear lab coats that are worn for science-based lab courses.

C. Clinical Equipment (Required for Winter Semester Year 1)

All students must have their own:

- Bandage scissors
- Stethoscope
- Watch with a second hand

D. Identification

Students must wear appropriate identification at all times when in the clinical setting. This includes the school name tag, school lanyard, a photo identification badge and on the upper left sleeve, the school crest. The student's full name must be visible at all times in all clinical areas.

E. Non-Uniform Attire

When assigned to clinical practice in community agencies and within some hospital units, students may not be required to wear the standard uniform. Within these settings, certain types of street attire are appropriate. Faculty, during orientation, will advise students as to the appropriate attire.

Students should note that in the case of visits to clinical agencies to do patient research, the guidelines for casual attire should be followed:

Casual Attire

Within most community agencies the guidelines for suitable casual attire includes casual/dress pants, skirts knee length or longer, non-see-through blouses and casual/dress shirts.

Unsuitable attire includes clothing that is excessively tight, form fitting or excessively baggy. Low necklines are inappropriate. Any attire displaying pictures, names, slogans, logos or inappropriate expressions is not acceptable. Spandex, jeans, and sweatpants and unsuitable.

Suitable footwear includes casual shoes with enclosed toe and heels. Clogs, sandals or boots are not appropriate.

All guidelines listed under A. Personal Grooming, apply when following the casual attire guidelines.

STUDENTS WILL BE REQUIRED TO LEAVE THE CLINICAL AREA IF THEIR UNIFORM DOES NOT CONFORM TO THESE GUIDELINES.

5.16 PROTOCOL FOR CLINICAL VISITS

When visiting a clinical agency to see clients or review records, students should seek out the nurse/agency personnel in charge of the unit or client. A full introduction, including name, school, course and purpose of the visit, should be made. If there are difficulties in meeting the objectives of the visit, the student should contact the faculty member. A professional image, as outlined in 5.1.4 Clinical Dress Code: Casual Attire, is the appropriate standard.

5.17 VALUABLES IN THE CLINICAL SETTING

Valuables taken to the clinical agency are the responsibility of the student. Students are advised not to take more money than they require for that day into the clinical area. In most clinical agencies, there is nowhere to store valuables.

5.18 EVALUATION OF STUDENT CLINICAL PERFORMANCE (NURSING PRACTICE APPRAISAL FORM)

The evaluation criteria for clinical learning experiences will be reviewed with students at the beginning of each nursing practice course.

There will be regularly scheduled evaluations of the clinical performance of each student during the semester.

Any clinical incidents deemed to be of a serious nature will be discussed with students at the time of the occurrence.

Students experiencing difficulties with nursing practice courses will be made aware of potential solutions and sources of help for the problems identified.

5.19 CLINICAL INCIDENT REPORT

In the event of a clinical incident such as a medication error, treatment error, patient fall, etc., the student, in consultation with faculty, will complete a CNS Clinical Incident Report (Appendix B).

In most clinical agencies students will also be assisted in completing an agency-specific incident report.

The action taken following any such clinical incident will be at the discretion of faculty and in keeping with seriousness of the incident as well as the unique circumstances surrounding each situation.

A major focus of the incident review will be assisting the student to meet learning objectives identified as a result of the incident.

The Clinical Incident Report will also be used to document any injury incurred by a student i.e. needle stick in the clinical area.

Any injury is to be reported immediately to the Occupational Health Nurse at the site. The Occupational Health Nurse will assume responsibility for initiating necessary treatment, teaching and follow up.

If the Occupational Health Nurse is not available or if any injury occurs during an evening or night shift or during a weekend, students should proceed immediately to the Emergency Department at that site for assessment. Based on the assessment, priority is determined and students are seen in order of importance.

5.20 REMEDIAL LABS

Students experiencing problems in the performance of nursing skills may be referred to the IRC to do a remedial lab.

This referral may be required for students who are involved in actual or potential medication errors. The nature of the remedial experience will be determined by the IRC Coordinator, based on the type of error made.

5.21 PHARMACOLOGY CLINICAL CALCULATIONS

At the beginning of clinical courses, there will be a learning experience designed to assist students in maintaining their competency in drug calculations and to identify any area(s) in which improvement is needed.

5.22 STUDENT AT RISK OF CLINICAL FAILURE OR DEEMED UNSAFE

As per School of Nursing promotion regulations 7.8, as listed in the University calendar, “A student may be required to withdraw from a nursing course with a clinical component or from the program at any time, on the recommendation of the Committee on Undergraduate Studies, if the student is deemed unlikely to profit from continued attendance in the clinical course or program and/or is deemed unsafe in a clinical setting. Students who are required to withdraw from the program for any of these reasons will not be eligible for future admission/readmission to the program or the School of Nursing”.

Policy

Expectations for Safe Clinical Practice

- 1) Students are expected to demonstrate growth in clinical practice through the application of knowledge and skills from previous and concurrent courses.
- 2) Students are expected to demonstrate growth in clinical practice as she/he progresses through the course and to meet the clinical practice expectations described in the course outline*.
- 3) Students are expected to prepare for clinical practice in order to provide safe and competent care. Preparation expectations are detailed in the course outline*.

The faculty member will inform the preceptor or co-signed nurse or agency contact that they should notify the faculty member as early as possible if any of the above three expectations are not met. This provides for timely initiation of remedial activities to maximize a student’s clinical progress.

Definitions

At Risk

A student is considered to be *at risk* for clinical failure if s/he has difficulty meeting the Nursing Practice Appraisal Criteria or other designated evaluation criteria in clinical courses.

Unsafe

A student is considered to be *unsafe* in clinical practice when his/her performance places himself /herself or another individual at risk for, or actually causes physical, psychosocial, or emotional harm (Scanlan, Care, & Gessler, 2001).

The School of Nursing recognizes the importance of identifying students who are *at risk* of failing a clinical course or who are deemed *unsafe* in clinical practice. Once the student has been identified as *at risk* or *unsafe*, through an occurrence or a pattern of behaviour*, a process is put in place to assist the student towards achieving competent and safe practice. If the *at risk* student's performance does not improve, the student will fail the clinical course. If the *unsafe* student's performance does not improve and continues to place himself or herself or others at harm or potential harm, the student will fail the clinical course and the university calendar nursing promotion regulation will apply (see current University Calendar, SON, Promotion Regulations).

Procedure for the At Risk Student

The Faculty Member:

1. Identifies the occurrence or pattern of behaviour* that places the student at risk of clinical failure and arranges to meet and discusses the same with the student as soon as possible.
2. Informs the course leader, and at any point in the procedure, the course leader may inform the Associate Dean/Director or designate.
3. Documents, within 48 hours, specific information about the area of concern (e.g. criteria not being met due to an occurrence or pattern of behaviour). Documentation must include date and time when the student was originally informed of the occurrence or pattern of behaviour and the verbal feedback given to the student.
4. Meets with the student as soon as possible to review the documentation.
5. Signs and dates the documentation.
6. Collaborates with the student to develop a Learning Plan to address his/her deficiencies in meeting the standards of nursing practice and or competencies as outlined in the Nursing Practice Appraisal Criteria and or other course designated evaluation criteria. The plan provides specific details outlining the objectives, strategies (e.g. return to the lab for instruction and review; review specific theory before next clinical day, follow up meetings with faculty), outcomes, and timelines that the student will have to meet. The consequences of failing to meet criteria will be outlined in the Learning Plan, e.g. removal from clinical unit or failure of the course.

7. Informs the student that his/her clinical performance will be evaluated for consistent and sustained improvement in accordance with the Learning Plan.
8. Advises the student that the consequences of failing to demonstrate consistent and sustained improvement in nursing practice will result in a failed grade.
9. Holds periodic meetings with the student to discuss progress toward meeting the Learning Plan objectives.
10. Documents supporting evidence of the student's ongoing clinical performance in relation to meeting the standards of nursing practice and or competencies as outlined in the Nursing Practice Appraisal Criteria and or other course designated evaluation criteria.
11. Determines if the student passes or fails the course in consultation with the course leader, Associate Dean/Director or designate.

The Student:

1. Meets with the faculty member to review the documentation.
2. Signs the form to verify s/he has read the document. The student's signature does not mean that they agree with the documentation but that it was discussed with him/her.
3. Responds in writing to the documentation, if desired, within 48 hours of receiving the document. It is recommended that the student discuss his/her perceptions of personal performance and how it relates to the standards of nursing practice and or competencies as outlined in the Nursing Practice Criteria and or other course designated evaluation criteria.
4. Collaborates with the faculty member to develop a Learning Plan to address his/her deficiencies to meet the standards of nursing practice and or competencies.
5. Acknowledges in writing that s/he is willing to participate in this Learning Plan.
6. Meets all components outlined in the Learning Plan.
7. Consults at any point in the procedure with individuals such as the course leader, individuals from counselling service and/or Associate Dean/Director or designate.

Procedure for the Unsafe Student

The Faculty Member:

1. Dismisses the student immediately from the clinical area if the student is deemed to be unsafe, either through one serious event or a pattern of unsafe behaviours*.
2. Notifies the course leader, who will notify Associate Dean/Director or designate as necessary.
3. Documents specific information about the unsafe situation/event/behaviour. Documentation must include how the occurrence or behaviour failed to meet the standards of nursing practice and or competencies as outlined in the Nursing Practice Appraisal Criteria and or other course designated evaluation criteria. Documentation includes date and time when the student was originally informed of the occurrence or behaviour and the verbal feedback given to the student.

4. Meets with the student as soon as possible to review the documentation.
5. Signs and dates the documentation.
6. Collaborates with the student to develop a Learning Plan to address the unsafe practice or behaviour. The plan provides specific details about the objectives, strategies (e.g. return to the lab for instruction and review; review specific theory before next clinical day, follow up meetings with faculty), outcomes, and timelines that the student will have to meet. The consequences of failing to meet criteria outlined in the Learning Plan will be clearly outlined, e.g. result in a failed grade in the course and/or implementation of the university calendar nursing promotion regulations (see current University Calendar, SON, Promotion Regulations).
7. Informs the student that clinical performance will be evaluated for consistent and sustained improvement in accordance with the Learning Plan.
8. Informs the student that the consequence of failing to demonstrate consistent and sustained improvement in nursing practice will result in a failed grade.
9. Holds periodic meetings with student to discuss progress toward meeting the Learning Plan objectives.
10. Documents supporting evidence of the student's ongoing clinical performance in relation to meeting the standards of nursing practice and or competencies as outlined in the Nursing Practice Appraisal Criteria and or other course designated evaluation criteria.
11. Determines if the student passes or fails the course in consultation with the course leader and Associate Dean/Director or designate as necessary.
12. The Associate Dean/Director consults with the Committee on Undergraduate Studies, at any point, as necessary, to review the unsafe clinical practice of the student. The committee will make a determination as to whether the unsafe practice requires that the student be required to withdraw from the nursing course and or from the program as per the university calendar nursing promotion regulation.

The Student:

1. Meets with the faculty member to review the documentation.
2. Signs the form to verify s/he has read the document. The student's signature does not mean that s/he agrees with the documentation but that it was discussed with him/her.
3. Responds in writing to the documentation, within 48 hours of receiving the document. It is recommended that the student discuss his/her perceptions of personal performance and how it relates to the standards of nursing practice and or competencies as outlined in the Nursing Practice Criteria and or other course designated evaluation criteria.
4. Collaborates with the faculty member to develop a Learning Plan to address his/her deficiencies to meet the standards of nursing practice and or competencies.
5. Meets all components outlined in the Learning Plan.
6. Acknowledges in writing that s/he is willing to participate in this learning plan.

7. Consults at any point in the procedure with individuals such as the course leader, individuals from counselling service, Associate Dean/Director or designate.
8. May appeal the decision if it is determined that unsafe behaviour requires him/her to be withdrawn from the nursing course and or from the program, as per the calendar regulations (see current University Calendar, General Academic Regulations, Appeal of Regulations).

* Note: In relation to the standards of nursing practice and or competencies as outlined in the Nursing Practice Appraisal (NPAF) criteria and/or other course designated evaluation criteria.

6. ADDITIONAL INFORMATION AND RESOURCES

6.1 CLASSROOM ETIQUETTE

In addition to the guidelines listed below, students are expected to adhere to Memorial University's *Student Code of Conduct 2014* available at www.mun.ca/student/conduct/conduct.php

There are rules of courtesy and professionalism that apply to classroom situations. A classroom is a formal setting; however, that does not mean that the interactions need to be controlled. It does mean that students and faculty have rights and responsibilities with regards to treating each other with courtesy.

Throughout this program you will have guest speakers, student presentations, and faculty lectures/lab/clinical activities which require much preparation. It is expected that you treat guest speakers, fellow classmates, and faculty members with respect. Respectful, professional and courteous behavior is expected during all activities. Outlined below are expectations for professional conduct to promote a healthy environment conducive to learning:

Noise

- When class begins, please stop your conversation.
- Wait until class is completely over before putting your materials away in your backpack, standing up, or talking to friends.

Entering and Exiting Class

- Please arrive on time to class and stay for the entire class. Late arrivals and early departures are disruptive for the presenter and for your classmates.
- If despite your best efforts, you arrive late, please enter through the rear door and quietly take a seat at the back of the classroom. If there are extenuating circumstances and you anticipate that you will need to leave class early please sit close to the rear door and leave as quietly as possible.

Electronic Devices

- Cell phones/smart phones /other electronic devices should be silent during the class period and placed in your backpack, purse etc.
- No audio, video, or picture taking during class without permission.

- If faculty notes any of the above, it will be addressed during the class period.

E-Mail Etiquette

- You are expected to write as you would in any professional correspondence. E-mail communication should be courteous and respectful in manner and tone.
- Faculty will make every effort to respond to e-mail promptly. However, if you e-mail a question at the last minute about an assignment or exam it may not be possible to send a response before the assignment or exam is due.

Food and Beverages

- Food is not permitted in the classroom during class time. Water bottles and beverages in covered cups are permitted.
- Food is permitted during class breaks. All garbage must be placed in the proper receptacle.

Other

If there are extenuating circumstances on a specific day regarding any of the above expectations please discuss with faculty in advance to ensure acceptable action.

6.2 INFORMAL RESOLUTION OF STUDENT COMPLAINTS

These guidelines are intended to facilitate informal resolution of student complaints. The process for formal resolution of complaints is outlined in the Memorial University Calendar.

- The initial attempt to resolve the complaint is made by the student and faculty member. Students are expected to approach faculty prior to seeking resolution at any other level.

Students who perceive that they need assistance with communication and or conflict management techniques may seek the services of the Guidance Counsellor prior to requesting an appointment with the faculty member.

- If the problem is not able to be resolved in the initial discussion between the student and faculty member, the appropriate Program Coordinator meets with the faculty member and student to try and seek a solution.
- If the faculty member or student does not wish to attend this meeting or if a solution cannot be reached, then the matter is referred to the Associate Director.
- Prior to referring the matter to the Associate Director, the Program Coordinator will provide documentation of the problem identified and the efforts at resolution initiated to that point.
- At any point in the process, the student may have another student present as a support person. Any student choosing to do so will be made aware that the confidentiality which normally prevails in faculty/student discussions cannot be guaranteed with a second student in attendance.

6.3 CANCELLATION OF LEARNING EXPERIENCES DUE TO ADVERSE WEATHER CONDITIONS

Students are advised that if Memorial University is closed **DUE TO ADVERSE WEATHER CONDITIONS** scheduled learning activities for the CNS will also be cancelled.

When the university is closed due to weather conditions, students are not expected to attend clinical if the clinical experience is supervised by faculty.

Students in a preceptored experience or in an independent practice supervised by staff nurses may go to clinical because they will be supervised by the agency. For these students, liability coverage is not affected by closure of the university.

Senior students in preceptorship or independent practice must make their own decision regarding their ability to get to their clinical area safely. If you are working in a clinical area and the university closes, you must make your own decision as to whether you remain in the area.

ALL BN STUDENTS ARE REMINDED THAT LEARNING EXPERIENCES MISSED DUE TO MUN CLOSURE MAY HAVE TO BE MADE UP IF FACULTY DEEMS THAT MAKE UP IS NECESSARY FOR EVALUATION PURPOSES.

6.4 EVALUATIONS (COURSE AND FACULTY)

Students may be requested to complete the following evaluations:

- Faculty evaluation - 11th week of the semester
- Course evaluation via on-line CEQ - 12th week of the semester

These evaluations are meant to be used to improve either the course structure or teaching methodologies. Individual student responses are anonymous. The faculty will not have access to the evaluations until the course grades are submitted.

6.5 SUBMISSION OF ASSIGNMENTS

Assignments may be placed in faculty mailboxes located in the CNS Mailroom. There are also assignment drop boxes located in the lobby of Southcott Hall. Whenever major course assignments are due, a drop box will be labeled, two days prior to the due date, with the name of the course, the faculty member and the due date. The drop slot will be emptied by 16:00 on the due date. Students are asked to ensure that assignments are placed in the correct drop box.

One assignment drop box is also labeled for other mail, dropped off after designated mailroom hours, which will not fit in the mailroom drop slot.

Assignments, other than major papers, projects, etc, may be placed in the drop slot in the mailroom door.

Students are advised to keep an electronic or hard copy of assignments prior to submitting them.

6.6 STUDENT RECORDS

6.6.1 Student Files

All documentation concerning a student's progress through the program is kept in the student's file. Students should know that this information is used by the faculty for the following purposes:

- eligibility for admission to and promotion in the program
- assessment of special needs or circumstances relevant to the student's progress
- references to potential employers and/or admission to graduate studies

6.6.2 Access

A student has the right to view his/her file in the presence of a faculty member or the CNS Registrar for the BN (Collaborative) Program.

6.6.3 Use of Student Papers/Projects

There will be times when faculty members may wish to use a student's paper/project as a sample of student work for accreditation purposes. Such papers/projects may be retained for program evaluation purposes providing that all identifying information is removed.

6.6.4 Student Profile

Students are asked to submit a Student Profile Form (Appendix D) at the end of the Winter semester of each academic year.

The information submitted is used in support of scholarship applications that require documentation of involvement in extracurricular activities and/or can be used in references.

Information will not be added retrospectively, so it is in your best interest to keep your profile current.

6.7 VERIFICATION OF ENROLLMENT

Please note that when students require letters to confirm their enrollment in the Program, the letters can be provided by the CNS registrar. However, documents requiring the Memorial University seal must be obtained from the Registrar's Office at Memorial University.

6.8 IDENTIFICATION

All students are required to purchase a CNS photo ID card. This card is to be worn in a visible area at all times during all clinical learning experiences and when writing examinations at the CNS. It is also to be presented when requesting borrowing privileges from the LRC or IRC.

Students will also be required to purchase a name pin with the CNS logo, name and the designation Bachelor of Nursing Student. Name pins will be required for all lab and clinical learning activities.

6.9 FINANCIAL ASSISTANCE/STUDENT LOANS

Financial assistance is awarded to students, on the basis of demonstrated financial need, through the Canada Student Loan program and provincial government grants.

The School of Nursing has no mechanism for dealing with individual loans for those students who are in student loan program(s) of Memorial University. It is the student's responsibility to know current policies governing funds regarding eligibility.

For full information, consult the Student Aid Division, First Floor, Coughlan College or on the Internet at <http://www.edu.gov.nf.ca/studentaid>.

6.10 SCHOLARSHIPS

A full list of Memorial University scholarships, bursaries and awards can be found in the University Calendar.

Throughout the year, students will be made aware of other scholarship sources as they arise. Notices will be placed on the appropriate bulletin boards.

6.11 LOCKERS

Lockers will be made available to students who request them. Students will complete locker application forms during the first week of class. Lockers will be shared. Locker assignments will be posted. All students are responsible for purchasing their own locks. Lockers should be locked at all times. At the end of the Winter semester/academic year, all personal belongings and locks should be removed from the lockers or they will be removed by CNS employees.

6.12 MAIL

The CNS mail room is located on the Ground Floor of Southcott Hall. The hours for mail distribution will be posted at the beginning of each semester.

Assignments, papers and other mail that you need to submit to faculty is to be brought to the mail room. The Operations Officer will place any mail submitted in the designated faculty mailbox. Students should ensure that the faculty member's name is clearly indicated on any mail submitted.

The use of the Assignment Drop Box is discussed in the section of the handbook labeled Submission of Assignments.

There is a drop slot in the mailroom door and students may submit mail via this manner at any time.

Memos from faculty/staff intended for students will also be distributed from the CNS mailroom. When there is mail for you, your name will be posted on the student Mail Distribution Bulletin Board adjacent to the mailroom.

For confidentiality reasons, students are not permitted to request mail for any other student.

It is your responsibility to check for mail daily and to cross your name off the list when you have collected your mail.

Students are not permitted to enter the faculty workrooms on tenth and eleventh floors to place mail in the internal faculty mail boxes.

Correspondence that you wish to submit to the Associate Director, BN (Collaborative) Program should be given to the management secretary for the BN (Collaborative) Program, Room 1111.

Students are requested not to have personal mail directed to the Centre. Such mail will be returned to sender.

Members of the Nursing Society Executive, CNSA Delegates and Class Executives may have professional correspondence forwarded to their attention to the:

**Administrative Office
Centre for Nursing Studies
10th Floor, Southcott Hall
100 Forest Road
St. John's, NL A1A 1E5
Fax: (709) 777-8176**

6.13 E-MAIL

All students will have a MUN e-mail account. Students will be given their e-mail address and have a password set up by the LRC staff during the LRC orientation.

Group distribution lists are established for each year of the program. Students should check their MUN e-mail on a regular basis as email is the method of correspondence. Please note: Each course will have a D2L shell, and all course related email is sent through D2L.

6.14 BULLETIN BOARDS

Bulletin boards are provided for notices and other informational materials. Such notices must be kept current and should not be placed elsewhere.

Notices should be typed or neatly written and should be dated. Notices, with the exception of those containing information needed throughout the entire semester, will not remain on the bulletin boards for more than two weeks.

Removal of outdated items will be the responsibility of the CNS Operations Officer.

Student Bulletin Boards are located as follows:

Ground Floor

- BN Students years 1 – 4. Notices regarding clinical placements, clinical orientation, etc. are posted on these boards.
- Nursing Society
- Learning Resource Centre
- General Information Board Intended for Public Use
- Community Initiatives
- Classroom, Lab and Conference Room Schedules
- Student Mail Distribution

First Floor

- Classroom, Lab and Conference Room Schedules
- BN Students year 1 – 4

Students are responsible for checking bulletin boards on a regular basis.

6.15 TRANSPORTATION

All nursing courses will be taken at the CNS. Non-nursing courses will be taken on the MUN campus. Whenever possible, schedules will be planned to keep your commuting time between the CNS and the MUN campus to a minimum. Arrangements related to the travel between the two sites are the responsibility of the student.

Transportation costs associated with clinical course requirements require additional financial expenditure on the part of the nursing students. Students assigned to acute care agencies and nursing homes will be assigned to shifts which necessitate arrival to or departure from an agency, outside the normal operating hours of public transportation.

The CNS increasingly makes use of clinical placements in community and non-traditional health care agencies within St. John's and the surrounding communities.

Due to the difficulty in finding sufficient clinical placements within St. John's to accommodate learning experiences for all students, it is likely that clinical placements outside of St. John's will continue to increase across all years in the program.

The travel and/or living expenses associated with clinical placements need to be budgeted for during each semester.

6.16 FOOD SERVICE

Canteen service is available from the Cafeteria located on the first floor of the Miller Centre. Hours of operation are as follows:

- Monday-Friday 08:00 – 15:00

Please note: These times may vary throughout the year. Notices of change are posted in the cafeteria.

6.17 PARKING

A limited number of parking permits will be made available to students in each year/program. A parking permit does not guarantee a parking place. A random draw of completed applications will take place to equitably distribute the parking permits.

These permits are valid only for the student parking lot. The cost is \$10.00.

A permit will not be issued until an application form containing the vehicle model, color and license plate number is submitted.

At the beginning of each academic year notices regarding the sale of parking permits will be posted on the ground floor bulletin boards for students in each year

of the program. Students who are not able to obtain a parking permit may place their names on a waiting list and will be notified if a permit becomes available.

6.18 SMOKING REGULATIONS

Smoking and second-hand smoke are recognized as serious health hazards. Effective since September 23, 2009, Eastern Health has a Smoke Free Environment Policy at all of its owned and operated facilities.

This policy includes that smoking is not permitted anywhere in or near buildings, on the grounds, in parking garages, or on the parking lots of Eastern Health sites and facilities.

6.19 FIRE SAFETY

As part of the CNS orientation, all students are required to attend a general information session on fire safety. This session is a mandatory pre-clinical requirement.

Part of the orientation to every clinical area includes reference to the student's duties in the event of fire.

The guidelines entitled, "Centre for Nursing Studies Code Red Action Card", prepared by the Emergency Preparedness Committee, Miller Site are posted throughout the CNS including classrooms, conference rooms, lab rooms and by elevators. Students are advised to acquaint themselves with these guidelines as well as knowing the nearest exit of all the rooms occupied for learning activities scheduled at Southcott Hall.

6.20 EMERGENCY PREPAREDNESS

All students are required to attend a general information session on emergency preparedness. This session is a mandatory pre-clinical requirement.

Codes have been established for various types of emergency situations in Southcott Hall.

For any **Medical Emergency** requiring medical assistance at Southcott Hall, **Dial 9 for an outside line, then 911**. State your medical emergency and your exact location in Southcott Hall.

For all other codes, **DIAL EXTENSION 2000** and identify the emergency situation you are reporting.

Action cards for Code Red (fire) are posted in all classrooms, lab rooms, conference rooms and near all elevators.

6.21 SCENT-FREE GUIDELINES

Eastern Health endeavors to provide a scent-free environment for clients, employees and all persons who use its facilities. Scented products contain chemicals which may cause severe problems for persons with asthma, allergies and chemical sensitivities.

To achieve this goal a Scent-Free Policy is in effect for all Eastern Health Buildings. All persons are advised to use fragrant-free personal care products. Eastern Health is committed to using environmentally friendly products.

Students are expected to follow this policy and are not to wear scented products in any clinical setting or while in the Southcott Hall Building.

6.22 CELL PHONE USE

The use of electronic communication devices, such as cell phones and smart phones, to place/receive calls, text messages, access internet sites, emails, video or photograph for personal reasons in the clinical setting is prohibited during working hours. Personal smart phones should be placed on vibration/silent mode during working hours and should only be used during rest periods and meal breaks. Use of personal cell phones in the presence of a patient is strictly prohibited.

Cell phone use is permitted in the Southcott Hall Building but must be silenced during scheduled learning activities.

**APPENDIX A:
GUIDELINES FOR CENTRE FOR NURSING STUDIES BN STUDENTS
CONCERNING USE OF MUN LIBRARIES**

1. BN students of the Centre for Nursing Studies should normally use the resources and services at the Centre for Nursing Studies Learning Resource Centre before using those at MUN Health Sciences Library (HSL) or Queen Elizabeth II (QEII) Library.
2. Instructional services in the use of library resources, including learning how to perform computer literature searches are available to you at the Centre for Nursing Studies Learning Resource Centre. Help with all computer programs is available by asking LRC staff for assistance, or by making an appointment for more in-depth instruction. The Health Sciences Library also provides workshops that are open to any MUN student.
3. Journals, books and audiovisual materials held at the QEII and Health Sciences Libraries can be used in-house.
4. You can sign out books and other circulating materials from the Health Sciences and QEII Libraries using your MUN student ID card.
5. MUN ID cards can also be used for photocopying and printing at HSL and QEII libraries.
6. The Study Rooms in the Health Sciences Library are available on a first-come, first-served basis to groups who are in health programs or who are using health science materials. Priority is given to students who are in the MUN Faculty of Medicine, School of Nursing or School of Pharmacy. Use of group rooms is limited to a minimum of two people.

Please Note: This applies to study rooms within the Health Sciences Library. Second floor seminar rooms in the Health Sciences Centre are for MUN School of Medicine students only.

7. Students requiring articles through Interlibrary Loan, which are not locally available may request the articles from Document Delivery at the Health Sciences Library using the request form located at <http://www.library.mun.ca/borrowing/ill/index.php>. When requesting articles, be sure to identify yourself as a Centre for Nursing Studies student. Journal articles requested through Document Delivery will normally be emailed; books ordered require in-person pick-up at the HSL.
8. Reference assistance in using the HSL or QEII Library is only available when the relevant Information Desk is open. It is not available from the Circulation Staff.
9. It is recommended that you use your primary site of instruction for library services whenever possible.

Questions or concerns related to these guidelines should be referred to Debbie O'Reilly in the Learning Resource Centre at the CNS.

**APPENDIX B:
CLINICAL INCIDENT REPORT**

To be completed by faculty for student incidents and submitted to the Associate Director BN (Collaborative) Program.

Date of Incident _____ Course _____
Clinical Area in which the incident occurred _____

Student: _____
Faculty: _____

Type of Incident: _____ Drug Error _____ Treatment Error _____ Fall _____ Other
_____ (please specify) _____

Description of the Incident (include a precise description of the event; client's immediate reaction, if any; person(s) advised of incident; where/ how incident was recorded; outcome)

Summary of Student Interview and Recommendations Made

**APPENDIX C:
STUDENT PROFILE**

NAME: _____ STUDENT NUMBER _____

ADDRESS: _____

ENTRANCE DATE: _____ EXPECTED GRADUATION DATE: _____

EXTRA CURRICULAR ACTIVITIES (include participation in intramural sports, school recruitment, health fairs, committees, clubs/societies, any volunteer work, etc.)

AWARDS/SCHOLARSHIPS (include any awards, prizes or scholarships that you have received during the program)

COMPETITIONS (include public speaking events, essay contests, etc. you may have entered while in the program)

Signature: _____ Date: _____

APPENDIX D
ASSESSMENT TECHNOLOGIES INSTITUTE: COURSE INCLUSION

The CNS, as a partner site in the BN Collaborative Program, has adopted the use of ATI (Assessment Technologies Institute) Nursing Education Learning System resources to assist students in preparing for the NCLEX-RN licensure exam written at the end of the nursing program. While these resources have been linked as closely as possible to specific course content, at times required components of the resources may not be reflected in specific course objectives. However, over the course of the entire curriculum, the required components will be relevant to comprehensive NCLEX-RN preparation.
