You are a nurse in the emergency room and you have a patient who has had an aneurysmal subarachnoid hemorrhage. He is 29 years old and otherwise very healthy. You are not very familiar with this type of brain injury and want to find out a bit more about it. You don’t have access to anything other than the internet so you decide to do a quick Google search. You retrieve the following list of websites. Which ones would you look at, and why? Which ones would you not look at and why?

#1 http://www.brainaneurysm.com/
#2 http://www.brain-surgery.com/aneurysm.html
#3 http://brainavm.uhnres.utoronto.ca/index.html
#4 http://bodyandhealth.canada.com/channel_condition_info_details.asp?disease_id=237&c hannel_id=2022&relation_id=16665
